

SUBMERSIBLE MOTOR PUMPS

K(S)

Single-stage submersible motor pump
without and with float switch (S)

For the pumping of clear water, waste water containing solids, washing machine water
as well as mineral oil* in: wastewater shafts, pits and tanks

- powerful
- low power consumption
- easy operating weight
- versatile
- protection against overheating
- sturdy and resistant
- long lifetime
- robust cable entry

K(S)

LIQUIDS

Clear water, waste water containing solids, washing machine water as well as mineral oil*

MATERIALS

Impact-resistant and glass-fiber reinforced plastic housing, electric motor encapsulation of stainless steel

TECHNICAL DATA

● Capacity	up to 19 m ³ /h (83 USGPM)
● Head	up to 11 m (36 ft)
● Temperature	max. 45 °C (113 °F) up to 3 min. max. 80 °C (176 °F)
● Protection class	IP 68
● Solids	up to Ø 10 mm
● Shaft sealing	triple-acting
● Connection	G 1/4 IG female thread
● Voltage	230 V
● Power supply	10 m cable with schuko plug IP 44

* at room temperature (in compliance with statutory regulations)
